MACHINE CONTROL

In the ever more competitive market an edge, that little something extra, to keep the customers happy, is needed.

And here it is.

Control your machines with the latest technology. Use the iPad2 or iPhone4 to control your machines. It will lower your costs to produce man / machine - interfaces and it will give you an unique platform to keep your costumers updated. Keep your customers updated with new functions or use the platform to inform about new products. You can even use the platform to receive spareparts orders.

All you need is a control-board and a customized App.

Give us a call today, and let us supply you with the solution for tomorrow.

Advanced controlboard
